Firmenbeschreibung

Rosti Mepal is located in Lochem, the Netherlands, and focuses on the production, design, manufacturing and distribution of consumer products. Marketing, sales and logistics is also an integral part of the organisation. This aspect ensures that clients enjoy a high level of service, flexibility and continuity. The heart of production is in the Netherlands. In all cases, Rosti Mepal demands the highest standards for material, quality, safety and workmanship. Since its establishment in the 1950s, Mepal has been a trusted name in the Dutch market, a synonym for plastic consumer products. A comparable position is attributed to the original Danish brand Rosti, which was also established in the middle of the last century. In 1993 Mepal and Rosti merged into a single enterprise, the current Rosti Mepal.
