Firmenbeschreibung

Sichuan Zi Guan Photonics Technology Co.,Ltd is a high-tech enterprise, committed to the development of optical Communication industry. Concentrated with researching, developing, producing and marketing. Our headquarter is located in Mianyang, technopole of China. We hold advanced process, technology and equipment in optical device production, gathered a group of engineering technicians and production staffs. New products and process have been developing and constantly improving for years, by cooperating with lots of China's domestic and foreign renowned optical communication companies and institutes. Strive to become a large-scale production base of passive and active optical devices in China. The company makes breakthroughs with the advantage of technological innovation. To keep technical products ahead in the lead, the company is actively adapting to the development trend of the optical communication industry. The company also uses international advanced production management mode to accumulate and d...
