## Firmenbeschreibung

As an Europe-wide producer of vegetables BEHR AG cultivates over 4,000 hectares of outdoor vegetables, of which 300 hectares are being cultivated organically. Our location in Spain enables us to supply our customers with fresh vegetables all year round, even during the winter months. By adhering to very strict farming guidelines, we are able to guarantee a consistently high level of quality at all times and at all locations. We are not only a major grower of vegetables, but also an owner-run family business – now in its fourth generation. It comes as no surprise therefore that our company is highly committed to the three pillars of sustainable development: economic, environmental and social responsibility. Among other things, this includes measures such as watersaving irrigation and water-purification processes and systems.
