Firmenbeschreibung

We (Dom and Susan) are committed to making the very most out of life and keeping our family healthy and happy. We like many of you believe that eating the best available natural ingredients and living healthily (most of the time) is essential. Not everyone has the time to make sure they are getting the balanced nutrients needed from their diet and with the widespread use of additives and pesticides, the quality of ingredients is sometimes questionable. We believe in complimenting our family's healthy diet with natural supplements in liquid form direct from natural food sources. So we started OVIO Wellness, what could be more natural than olive leaf water infusions - bringing a key building block of the Mediterranean diet to you as liquid supplements and functional drinks.
