Firmenbeschreibung

yavalu is the first mobile financial advisor for next-generation financial management. It analyzes a portfolio of exchange-traded funds and offers individual investors sophisticated investment management services. This do-it-yourself portfolio management solution is backed by yavalu's in-depth expertise in personal financial management. This solution is ideal for both customers who prefer more control over their investment plan and who require guidance each step of the way. Instead of seeking to profit from management fees, yavalu seeks to radically reduce fees and keep money at work. yavalu shifts the balance of power to create a new service that shifts the balance of power from bankers to individual consumers, and offers great potential for transforming the entire personal financial management industry for the better.
