Описание компании

Environmentally friendly and efficient insecticides are what Aeroxon®, the traditional trademark of Fr. Kaiser GmbH, a family business based in Waiblingen near Stuttgart, has stood for over 100 years. In 1909 a sweet manufacturer from Swabia, Theodor Kaiser, developed "The Fly Catcher with pull band", thereby laying the foundations for the company. New products are developed in-house and tested by independent research institutes. The main focus has always been the safe and effective use of the products. Numerous awards from Stiftung Warentest and Ökotest (both German consumer organizations) as well as high levels of customer loyalty have proven the success of this philosophy. Once again in 2012, Aeroxon® is the leading brand within the food retailing (Source: Nielsen Household Insecticides Germany 2012).
